Logo Sketch:

A minimalist, corporate-style logo featuring a stylized eye with a fragmented or hollow pupil, symbolizing both vision and loss.

A tagline beneath might read: **"See More. Know More. Be More."**

Home Page Introduction (Draft):

Welcome to **VisioCorp**, the world leader in predictive technology. Our **Future Sight Glasses** offer unparalleled access to tomorrow's decisions today, ensuring you never make a wrong move again. The cost? A small price to pay for absolute certainty.

For centuries, humankind has sought control over the unknown—through prophecy, science, and data. Now, the future is no longer a mystery; it is a **choice**. Will you take control, or be left behind?

The decision is yours.

About VisioCorp (Draft):

VisioCorp is a revolutionary biotechnology company founded on one simple truth: knowledge is power. Our groundbreaking **Future Sight Glasses** provide users with the ability to see their own futures—allowing them to navigate life's uncertainties with precision and clarity.

Our innovations come at a necessary exchange. To access the future, one must first relinquish their sight. This ensures that those with true commitment, vision, and ambition are the ones guiding the course of history.

VisioCorp operates at the intersection of **technology, fate, and human potential**. By harnessing the wisdom locked within the human eye, we provide a select few with the **ultimate advantage**. The future is no longer unknown. It is simply waiting to be seen.

Memorial Requirement:

A digital **Wall of Visionaries**, commemorating those who have made "The Exchange." Everyone's name and a short biography will be listed, honoring their sacrifice. Some testimonials may include messages from family members, emphasizing the high cost of their decision.

Three Pieces of Research (Drafts):

1. How Thinking About the Future Makes Life More Meaningful

Quote

Modern corporations already predict consumer behavior with **95% accuracy**, using AI and machine learning. VisioCorp takes this further, using **biometric foresight** to shape global markets and personal decisions. What happens when predictive knowledge is monopolized?
